

# Banner BS210CS Bench Mount Cut Off and Hose Skiving Machine

The BS210CS, available with 12, 110, 220 and 400 volt power supply options, is suitable for distributor, workshop and mobile applications. Mounting holes are provided on the base of the machine.

The 250mm steel cut off blade offers full DN50 (-32) hydraulic hose cutting capacity.

Moveable table pins allow selection of the most suitable hose bend radius for safe, clean and dust free cutting. The fully adjustable skiver mechanism comes with a complete set of 10 quick change mandrels ranging from DN6 up to DN50.

Rubber dust skived from hoses is collected in an easily removable integral container. A dust extraction mounting facility is also provided at the rear of the skiving wheel guard.

- Ideal for both workshop and mobile use
- -32(DN50) hose capacity

## Safety

Both the cutting blade and wire brush are fully guarded to meet health and safety requirements

## SPECIFICATION BS 210CS
